Invitation to the Shipper Training Session for the new PRISMA European Capacity Platform

Dear Sir or Madam,

A unique Europe-wide project is being launched in April 2013: 23 European gas transmission system operators will for the first time be marketing capacity over a joint online platform. For you as a shipper this means above all that in the future you will be able to plan your gas transport in seven countries in the core of Europe easily, conveniently and flexibly via one single online platform. We at PRISMA, in partnership with the participating European transmission system operators, would like to inform you about the latest developments of the new European Capacity Platform in order to help you prepare for the coming changes.

Hence, we cordially invite you to find out about the most important characteristics of the future European capacity platform at the three forthcoming shipper congresses in Vienna, Brussels and Warsaw. In particular, you will learn about how the registration and auction processes of the new platform work as well as about the possibilities the new European platform PRISMA holds for you. Please see the attached program for further information.

Participation in these training sessions is free of charge. Please note that all of the shipper training sessions will be held in English and that some of the involved TSOs may additionally hold further workshops to inform about the various regional aspects. For further information please contact the respective TSO.

If you are interested in participating in one of February's shipper training sessions please fill in the attached reply form and send it back to info@prisma-capacity.eu. Please note that the registration deadlines for the events vary depending on the workshop you would like to sign up for.

We are looking forward to hearing from you about your participation in one of the shipper training sessions.

Best regards,

PRISMA European Capacity Platform
